Click on "Get a free key"

Get your API key and up to 330 free hours of speech-to-text

Experience AssemblyAI's industry-leading accuracy, low latency, and powerful Speech AI capabilities. No credit card required.

With our API, you'll get access to:

Speech-to-Text

Build on the industry's most accurate ASR model, with only 30.4s latency on a 30 min audio file

Streaming Speech-to-Text

Automatically turn live audio into text with >90% accuracy and ~300ms latency

Speech Understanding

Extract maximum value from voice data and generate insights, summaries, and more

[See all in docs >](#)

Speaker Diarization

Detect the number of speakers in your audio file, with each word in the text associated with its speaker.

[See how in docs →](#)

PII Redaction

Identify and remove Personally Identifiable Information, such as phone numbers and social security numbers, from the transcription text before it is returned to you.

[See how in docs →](#)

Automatic Language Detection

Identify the dominant language spoken in an audio file and use it during the transcription.

API Keys

To learn more about managing Projects and API keys, visit the [documentation](#).

Note: An API key created within one project will not be able to access transcripts data from another project. This separation maintains data security and prevents unintended cross-project access.
